

GREENHOUSE GAS REDUCTION POLICY Page (1 of 1)

Chairperson: _____

PURPOSE:

To provide guidance for reducing green house gas emissions for the Sacheen Lake Sewer and Water District.

APPLICABLE REGULATIONS:

Reference 2012 Public Works Trust Fund Application.

Policy:

The Sacheen Lake Sewer and Water District shall attempt to reduce greenhouse gas emissions in all facets within our jurisdiction. Our efforts will include, but not be limited to:

- Ride sharing to all district events whenever possible.
- Prohibit equipment idling at all times possible, including during construction activities.
- Specifying high efficiency electric motors for all pumps and agitators.
- Specifying high efficiency lighting on all building and facilities.
- Specifying high R-value insulation on all buildings.
- Specifying high efficiency heating systems on all buildings.
- Specifying use of recycled building materials where possible.
- Investigate partnering with Diamond Lake Sewer and Water to reduce trips for water quality testing.
- Monitor the efficiency of pumps in the sewer system and operate them at peak efficiency.
- Recycle all appropriate printed materials to paper recycling facility.
- Encourage water and power conservation activities within the District.
- Encourage reductions and suggest alternatives to fertilizers and hazardous house hold chemicals.
- Promote any other appropriate efforts that will reduce greenhouse gas emissions.
