SEWER CONNECTION FEES

Page (1)

Chairperson: _____

PURPOSE:

To document connection fees to the Sacheen Lake sewer system.

PROCEDURE:

Connection Fee will be based on years of system operation beginning January 1, 2016 and “catching up” to fees paid by others using the system. Based on current rates, the connection fees for the next few years would be:

2021	\$9,297.28
2022	\$10,869.16
2023	\$12,441.04

The connection fee would be broken down and credited into each fund as current connections are.

Monthly billing would begin with the January billing of the following year of connection at the prevailing rate. That January billing would also include the additional fees for full O&M from time of installation.

This connection fee does not include the cost of the grinder pump, control box, installation, or any engineering fees that may be necessary. These will be billed based on current costs and mark-ups established.
